## THE NEW ASSESSMENT OF PRIMARY SCHOOL CHILDREN.

From the school year 2020/21, the periodical and final assessment of primary school children no longer contains numerical marks, but it is based on four learning levels (such as recommended in O.M. 172 4<sup>th</sup> December 2020).

The learning levels are four:

- **Advanced**
- **Intermediate**
- **Basic**
- **On the way to acquiring first notions**

THE CHILDREN'S LEARNING LEVELS ARE DEFINED AS FOLLOWS:

- **Advanced**

The child is able to do the homework given by the teacher always alone, even if there are new topics, using many and personal resources.

- **Intermediate**

The child is able to do the homework given by the teacher alone if he already knows the topics. He needs the help of the teacher if he does not know the topics.

- **Basic**

The child is able to do the homework given by the teacher only if he already knows the topics and using resources prepared by the teacher. At times, he is able to do the homework alone; at times, he needs the help of the teacher.

- **On the way to acquiring first notions**

The child is able to do the homework given by the teacher only if he already knows the topics and if he has received help from the teacher, for example simplified resources.

The children's learning levels are defined by the type of situation. For example:

the **INDEPENDENCE** in doing the homework, namely if the child needs the help of the teacher to do the homework.

The **SITUATION**: the child does homework related to topics he already knows or if they are new.

The **RESOURCES** the child uses.

The **CONSISTENCE**: if the child always completes the homework, namely if he is consistent.
